Parshvanath Jayanti

Bhagwan Parshvanath is 23rd Tirthankar (prophet) in Jain Religion. He was born about 3000 years ago in Varanasi to King Ashvasen and Queen Vamadevi. Parshva grew up in the midst of wealth and happiness.

At that time there was a mendicant named Kamath. He practiced severe penance and performed rituals called Panchagni (five fires).

When Parsva-kumar heard about Kamath's ritual, he realized the violence towards living beings involved in a fire. Kamath denied that any life was at stake because of his ritual. However, by extra sensory perception, Parshva-kumar sensed a snake trapped inside one of the burning logs. He asked his men to remove the log and chop it carefully. To everyone's surprise, a half burnt snake came out of the burning piece of wood. Parshvanath recited Namaskar-mantra for the benefit of the dying snake.

Observing the miseries that living beings had to experience in their worldly life, Parshva-kumar developed a high degree of detachment towards worldly possessions and relationships. At the age of 30, he renounced all his possessions and family and became a monk.

Parshavanath ultimately attained omniscience on the 84th day of his renunciation. That was the 4th day of the dark half of the moon of Falgun (that usually falls in April).

Parshvanath then began preaching true religion. He reinstated the Tirtha or religious four-fold order and became the 23rd Tirthankar of Jain religion. He had ten *Ganadhars*, the principal disciples of Tirthankars. He attained nirvana at the age of 100 at Samedshikhar. This hill is located in the state of Bihar and is the most famous place of pilgrimage for Jains.

Parshva-kumar demonstrated a very keen sense of non-violence and detachment from all material possessions and from relationships with people. These are the qualities essential for attaining self-realization. He showed us that one should be detached and impartial regardless of whether a person is our well wisher or enemy. We may not always know and understand the reason why a person behaves in a strange way towards us for it may be because of our karmas from a past life.

Voice of the Omnipresent

**eyam khu nanino saram, jam na himsai kamcana
ahimsa samayam ceva, eyavamtam vayaniya**

The essence of all knowledge is not committing violence. The doctrine of ahimsa is nothing but the observance of equality, i.e. the realization that just as I do not like misery, others also don't like it. Knowing this, one should not kill anybody.

Vegetarianism Projects—Gyanshala Students

Over the Thanksgiving Holidays Gyanshala children conducted research and submitted their projects to Samanijis for review on Dec 7th. The main topic for the projects was Vegetarianism.

The Darshan group (above 9) researched on restaurants, food items (chips, cookies etc.) and wrote about the vegetarian alternatives available in the market, and what popular brands were really not purely vegetarian and should be avoided. For the restaurants they found which ones are safe for vegetarians and where one should not be going. Children came up with specific examples and names of the ingredients harmful to us.

The Gyan group-1 (ages 6-8) prepared a collage each for the vegetarian food groups: proteins, carbohydrates, mineral, vitamins, fats etc. and their most important sources. They displayed a variety of foods and different materials for the work.

Last but not least, the Gyan group-2 (ages 3-5) colored and decorated pictures of fruits and vegetables given to them.

Respected Samanijis reviewed the projects and commended the students for their hard work. Students also provided copies of their research to all parents. Overall it was great learning experience for all and the kids had fun while doing it. - By: Kajal Jain

Feedbacks from Samaniji's Seminar at the University of Houston

Samaniji were invited to University of Houston to teach “The Role of Saman order” and “Preksha meditation.”

The seminar was arranged by Andrea Jain. Following are a couple of feedbacks from the session.

It's always interesting to see an inside view of monastic life, especially when they are women in a typically male-dominated realm. The sisters were so gracious to share their history, practice and meditation with us. We learned that the Samani order of Jainism embraces all people as an art of living. We think it is im-

portant in academia to expose students to all forms of religion and culture so that we may embrace each other as humans here together on a mission as spiritual beings. The Samani order is dedicated to dispelling the misconceptions and misinterpretations of Jain practice and philosophy.

The sisters also called to attention the all-important breath. During the presentation they led the class through Preksha Meditation. It was enlightening for many of us to realize that our breath, that which feeds our bodies and brains with oxygen, were only operating at a minimal level. In order to increase the level of oxygen intake, the sisters taught us the importance of taking deep conscious breaths...
