

My Study for the Growth of Singhania University

*—Dr. Sohan Raj Tater
Pro Vice Chancellor ,Singhania University*

Preamble

This is my privilege to have fruitful dialogue on 22 February, 2009 with respected D.C. Singhania Sahib, Chancellor and founder of Singhania University. At the first instance, I was very much impressed with his grand personality. During meeting with him, I felt as I am sharing my ideas with my elder brother. I found him a man of high ideals and follower of moral and ethical values. I realized depth of experience and height of knowledge in him. During my half an hour discourse with him I got directions to develop Singhania University in five aspects :

- (i) Growth of Science and Technology faculty of University.
- (ii) To meet out challenges being faced by Singhania University emerging in near future.
- (iii) To establish faith of Singhania University in the hearts of people among near vicinity.
- (iv) Exchange of students and faculties with foreign universities.
- (v) To impart quality education so that placement of students may be secured.

Singhania University is situated in a pollution free campus away from the city crowd. It is in a very peaceful environment where students can attain concentration of mind very easily without more efforts for their studies. On that day I was introduced by skillful Registrar with all Deans and HODS of all the faculties of our University. I was paid respect by all, so I felt that I am moving around in my home i.e. **I felt quite homely atmosphere in whole of University.** Looking to loyalty of faculty members I realised all growth potentialities in our University. I found that management of this University believes in "**Honesty is the best policy**" and whole environment of University is framed with policy of honesty.

Cultivation of Education Environment

The Singhania University consists of four faculties viz., Engineering, Management, Bio-Technology and Allied Health Sciences. The University provides continuous education beginning from KG in school to higher education, under one roof. **This is main plus point of this University.** Parents need not to bother for their children to shift from primary to secondary to U.G. to P.G. and finally for Research education. Singhania University offers world-class infrastructure, highly qualified and dedicated faculties and excellent environment for academic and intellectual growth. We are to raise quality of higher education. It should be easily accessible to one and all. In my opinion following moral and ethical values should be cultivated among management, faculties, students and non-teaching staff to make Singhania University an example of excellence comparable to the best in the world .

(i) Cultivation of faith in success of Singhania University

We people associated with management of Singhania University must have deep rooted faith that our University is pioneer in near vicinity and in future coming days it will achieve place of excellence in the world. The foundation of this University is laid by visionary honourable D.C. Singhania sahib with the inspiration of his noble and pious mother for noble cause. So for noble cause it will always go on growing. **At every time and on every occasion we should go on feeding in subconscious minds of all members of Singhania University family that this University is yours. You are family members of this University. All of us should always have faith in success of Singhania University.**

(ii) Cultivation of Discipline

Management should never compromise in the matter of discipline. **Discipline must be soul of our University.** We should never tolerate indiscipline at any level at any cost. Faculty members and students must be given training of being well disciplined regarding punctuality of time, study hours, behaviour with fellow persons and preparation of prescribed study course. At every time we should inculcate feelings of discipline among each and every member of this University.

(iii) Inculcation of Devotion

We should create environment of devotion in each and every member of University. Top management officials themselves must be well devoted to Singhania University. **The person who is devoted to his profession definitely get success.** During study hours the feeling of deep rooted devotion to their career must be inculcated among students. Faculty members must also be fully devoted in their excellent level of teaching.

(iv) Inspiration of Dedication

It is told by prominent Jainacharya Tulsi that :

University is a temple, teachers are its worshippers, students are its devotees and knowledge is their God. Each and every member of University must be dedicated to Singhania University. We are to nurture and cultivate young minds in the pursuit of devotion. Devotion to this university must be deep rooted in the mind of each and every member of this University.

(v) Development of feelings of concentration of mind

Success of student depends upon studying with full concentration of one's mind. We should teach lesson to our students : **Play while play, read while read, rest while rest.** Students should have an art of concentration of mind. We should call some expert time to time to demonstrate our students the ways of achieving concentration of mind. Our students and faculty members must live a disciplined scheduled life in University campus to achieve concentration of mind. Emotions of each member of University must be controlled.

(vi) Skillful Management

Management part of University must be quite active. We should be punctual in providing all infrastructure facilities needed for creating education environment in Singhania University. There should be frequent supervision of all arrangements made with respect to infrastructure available in our University. Management should listen the legitimate problems of students, faculty members and non-teaching staff and should find out and give solutions at once. This will create a good impression in the minds of students and their parents. This way students and their parents will be attracted to get admission in our University.

(vii) Providing Justice for all

Management should work with a open mind. There should be no partiality in the minds of management officials for anybody. Each and every member of Singhania University must be equal in their minds. We should listen request made by any member of Singhania University and try to give him adequate justice. There should not be any partiality with anyone. All should be treated equal with the eye of justice. **Justice will make Singhania University family an unique family.** Justice to all will cultivate moral and ethical values-faith, discipline, devotion and dedication among every member of our University.

My Contribution to University as Vice Chancellor

During my visit on 22 February 2009 to Singhania University I was paid due respect by D.C. Singhania sahib and all Deans and HODS of Singhania University to whom I was introduced by skillful Registrar of University Shri Jeet Singhji. My conscious inspired me to work here with full time remaining there with full devotion, dedication and discipline. Basically, I am Mechanical Engineer [Passed B.E. (Mechanical) in 1969 with first division] and having 30 years practical experience of field in P.H.E.D. department of Rajasthan Government up to the rank of Superintending Engineer. Onwards I have 10 years experience of management and teaching in Jain Vishva Bharati University, Ladnun (Raj.). Thus I have total rich experience of administration of total 40 years in Science, Engineering, Technology, University and teaching also. I have already worked for 10 years on the post of Superintending Engineer P.H.E.D. equivalent to Vice Chancellor post. So University administration as Vice Chancellor is not a new work for me. I am well matured fellow already worked and working in unidirections. My detailed academic work may be seen on following websites :

(i) www.drsohanrajtater.com

(ii) German website www.herenow4u.de, click to Glossary, click in alphabet T-Tater, Dr. Sohan Raj.

(iii) www.google.co.in and search : Dr. Sohan Raj Tater

I am leading Vanprasthashram Jain Sadhak life since last seven years. Apart from Jain Vishva Bharati University, Ladnun (Raj.) I am convener to Parmarthik Shikshan Sanstha, Ladnun (Raj.) since last seven years which builds up Jain monks and nuns characters. During my seven years tenure 101 lady trainers (called mumukshus) trained by me have already got initiation as Jain nuns from our Guru Acharya Mahapragyaji. Thus I am brought up in a high moral and ethical value based environment and myself being well disciplined, well behaved, emotional controlled fellow who believe in honesty and good administration. I have full self-confidence and will prove myself as good Vice Chancellor on the basis of my moral and value based qualities, as I have already worked in University and throughout career worked as good administrator. I shall prove myself as milestone in the growth of Singhania University by inculcating the values I have already mentioned earlier.

Review of Targets and achievements with bottlenecks

The goal of Singhania university is to make its students global citizens on completion of their higher education. The University imparts employment oriented and value based education. The main objective of department is to provide training and placement to technical/non-technical/skilled/semi skilled or non skilled persons in reputed organizations in India and abroad. University is running job oriented courses through which placement of students is quite secured. The faculty is fully committed to impart quality education by investing all its skill and knowledge. Special emphasis is laid on communication skills and personality development. Due emphasis on ethical and moral values through broad based management skills.

We are to decide targets and achievements for each and every department. Certain performas and formats are to be designed and served to each department indicating their targets and achievements. Departments are supposed to fill up those formats and submit to Chancellor monthly/quarterly/half yearly/yearly as per requirement to review the targets and achievements in presence of all Deans/HODS/ with bottlenecks. Each

and every bottleneck is to be pin pointed and removed with no time. Cent percent targets must be achieved for the growth of Singhania University.

To make higher education accessible to poor people university is initiating novel schemes of scholarships to meritorious students and loan facility. Students should be either as self-employed or are well equipped and trained to get employment globally. Singhania University is to provide such education as may suit the emerging employment opportunities globally.

The ultimate target of Singhania University should be that after taking quality and value based education from this University he should get placement globally. Then the environment will be created in near vicinity that to get admission in this University means sure to get placement. I wish all success and highest growth of Singhania University around world. I hope it should earn name and fame in coming days.
